Deliver to: Nabil M. El Hady — Art Group: 2154

Company Name: USPTO

Facsimile No.: 703-746-9195 — Date: April 9, 2004

From: James H. Salter, Reg. No. 35,668

Our Docket No.: 42390P16028 — Number of pages 4 including this sheet.

Application: 09/681,671 — Filing Date: 5/18/2001

Subject
Filing Receipt Correction

Remarks
Attached is a Request For Corrected Filing Receipt, marked-up Filing Receipt and copy of patent application specification page with Cross Reference to Related Application information.

If you do not receive all the pages, or if there is any difficulty in receiving, please call: (408) 720-8300 and ask for Claire Wallters.

REQUEST FOR CORRECTED FILING RECEIPT	Docket Number 42390P16028

In re Application of	Siew Yong Sim, et al.
Application Number	09/681,671
Filed	5/18/2001
For	METHOD AND APPARATUS FOR INITIALIZING A NEW NODE IN A NETWORK
Group Art Unit	2154
Examiner	Nabil M. El Hady

1. Attached is a copy of the Official Filing Receipt received from the PTO in the above application for which issuance of a corrected Official Filing Receipt is respectfully requested.

2. There is an error with respect to the following data, which is:

☐ Incorrectly entered

and/or

☒ omitted.

Error in	Correct Data
	Domestic Priority as claimed by applicant This application is a DIV of 09/681,644 05/15/2001 which claims benefit of 60/266,286 10/26/2000

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

Stylesheet Version 1.0

Method and Apparatus For Initializing a New Node in a Network

Cross Reference to Related Applications

This application is a divisional of U.S. Application No. 09/681,644, filed on May 15, 2001, entitled "Method and Apparatus For Large Payload Distribution in a Network," which claims the benefit of U.S. Provisional Application No. 60/266,286, filed on October 26, 2000, entitled "Large Payload Delivery Networks Having Integrated Content Management Services," the specification of which is herein incorporated by reference.

Background of Invention

[0001] This invention relates to the field of content delivery. More specifically the invention relates to delivering large payloads (i.e., files) closer to users in a network environment.

[0002] Content delivery in a network environment involves sending information (e.g., in the form of a file) from a content provider to multiple content servers which may serve their content to multiple users residing at various destinations on the network. The content provider generally puts the information that is to be distributed onto a computer connected to a network. This computer is often referred to as a content server. Any client-server or peer-to-peer communication protocols may be applied for a content server to further transfer the information to a group of content servers in the same or different networks that are assigned to serve the information. The source content server is usually called the origin server. The information resides in a file on a content server and is available to users of the network. When users request access to the information, the contents of the file are delivered from any of the content servers that are assigned to serve the content to the requesting users using the desired file
